Power windows

The power windows can be opened and closed using the following switches.

1 Closing

2 One-touch closing*

3 Opening

4 One-touch opening*

*: Pushing the switch in the opposite direction will stop window travel partway.

Lock switch

Press the switch down to lock the passenger window switches.

Use this switch to prevent children from accidentally opening or closing a passenger window.

The passenger windows can still be opened and closed using the driver's switch even if the lock switch is on.

■ The power windows can be operated when

The "ENGINE START STOP" switch is in IGNITION ON mode.

■ Operating the power windows after turning the "ENGINE START STOP" switch OFF

The power windows can be operated for approximately 45 seconds even after the "ENGINE START STOP" switch is switched to ACCESSORY mode or turned OFF. They cannot, however, be operated once either front door is opened.

■ Jam protection function

If an object becomes caught between the window and the window frame, window travel is stopped and the window is opened slightly.

■ When the power window does not close normally

If the jam protection function is operating abnormally and a window cannot be closed, perform the following operations using the power window switch on the relevant door.

- After stopping the vehicle, the window can be closed by holding the power window switch in the one-touch closing position while the "ENGINE START STOP" switch is turned to IGNITION ON mode.
- If the window still cannot be closed even by carrying out the operation explained above, initialize the function by performing the following procedure.

STEP 1 Hold the power window switch in the one-touch closing position. Continue holding the switch for a further 6 seconds after the window has closed.

STEP 2 Hold the power window switch in the one-touch opening position. Continue holding the switch for a further 2 seconds after the window has opened completely.

STEP 3 Hold the power window switch in the one-touch closing position once again. Continue holding the switch for a further 2 seconds after the window has closed.

If you release the switch while the window is moving, start again from the beginning. If the window continues to close but then re-open slightly even after performing the above procedure correctly, have the vehicle inspected by your Lexus dealer.

Door lock linked window operation

The power windows can be opened and closed using the mechanical key. (→P. 505)

Customization that can be configured at Lexus dealer

Settings (e.g. linked door lock operation) can be changed. (Customizable features →P. 553)

CAUTION

Closing the windows

Observe the following precautions.
Failing to do so may result in death or serious injury.

- Check to make sure that all passengers do not have any part of their body in a position where it could be caught when a window is being operated.
- Do not allow children to operate the power windows.
  Closing a power window on someone can cause serious injury, and in some instances, even death.

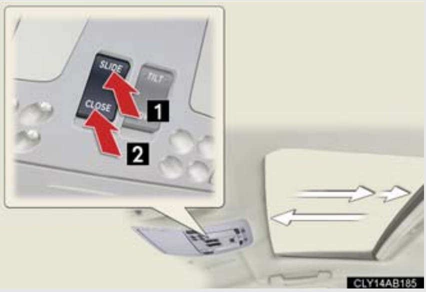

Jam protection function

- Never try jamming any part of your body to activate the jam protection function intentionally.
- The jam protection function may not work if something gets caught just before the window fully closes.

Moon roof*

Use the overhead switches to open, close, and tilt the moon roof up and down.

Opening and closing

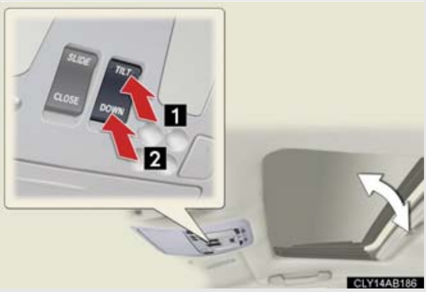

1 Open*

The moon roof stops slightly before the fully opened position. Push the switch again to fully open.

2 Close*

*: Lightly press either of the moon roof switches to stop the moon roof partway.

Tilting up and down

1 Tilt up*

2 Tilt down*

*: Lightly press either of the moon roof switches to stop the moon roof partway.

*: If equipped

■ The moon roof can be operated when

The “ENGINE START STOP” switch is in IGNITION ON mode.

■ Moon roof open warning buzzer

The buzzer sounds and a message is shown on the multi-information display in the instrument panel when the “ENGINE START STOP” switch is turned OFF and the driver's door is opened with the moon roof open.

■ Door lock linked moon roof operation

The moon roof can be opened and closed using the mechanical key. (→P. 505)

■ Operating the moon roof after turning the “ENGINE START STOP” switch OFF

The moon roof can be operated for approximately 45 seconds even after the “ENGINE START STOP” switch is switched to ACCESSORY mode or turned OFF. It cannot, however, be operated once either front door is opened.

■ Jam protection function

If an object is detected between the moon roof and the frame while closing or tilting down, travel is stopped and the moon roof opens slightly.

■ To reduce moon roof wind noise

When the moon roof is opened automatically, it will stop slightly before the fully open position. Driving with the moon roof in this position can help reduce wind noise.

■ Sunshade

The sunshade can be opened and closed manually. However, the sunshade will open automatically when the moon roof is opened.

■ If the moon roof closes but then re-opens slightly

STEP 1 Stop the vehicle.

STEP 2 Press and hold the "CLOSE" switch until the moon roof completely closes.

During the operation, the moon roof will move in the manner outlined below. If the switch is released during the operation, the operation will have to be performed again from the beginning.

The moon roof will close, open and then pause for approximately 10 seconds. Then it will close, tilt up and pause for approximately 1 second, after which it will tilt down and open and then close.

If the moon roof does not fully close even after performing the above procedure correctly, have the vehicle inspected by your Lexus dealer.

■ If the moon roof tilts down but then tilts back up

STEP 1 Stop the vehicle.

STEP 2 Press and hold the "TILT" switch until the moon roof moves into the tilt up position and stops.

STEP 3 Release the "TILT" switch once and then press and hold the "TILT" switch until the moon roof completely closes.

After moving to the tilt up position, the moon roof will move in the following manner. If the switch is released during the operation, the operation will have to be performed again from the beginning.

The moon roof will pause for approximately 10 seconds while in the tilt up position and then make some fine adjustments. Following this, it will pause for approximately 1 second, tilt down, open and then close.

If the moon roof does not fully close even after performing the above procedure correctly, have the vehicle inspected by your Lexus dealer.

■ Customization that can be configured at Lexus dealer

Settings (e.g. linked door lock operation) can be changed.
(Customizable features →P. 553)

CAUTION

Opening the moon roof

Observe the following precautions.
Failing to do so may cause death or serious injury.

- Do not allow any passengers to put their hands or heads outside the vehicle while it is moving.
- Do not sit on top of the moon roof.

Closing the moon roof

Observe the following precautions.
Failing to do so may result in death or serious injury.

- Check to make sure that all passengers do not have any part of their bodies in a position where they could be caught when the moon roof is being operated.
- Do not allow children to operate the moon roof.
  Closing the moon roof on someone can cause death or serious injury.

Jam protection function

- Never try jamming any part of your body to activate the jam protection function intentionally.
- The jam protection function may not work if something gets caught just before the moon roof fully closes.
